KOPENHAGEN FUR OFFERING 2009/2010

In the season 2009/2010 Kopenhagen Fur expects to offer a total of 17.9 million mink skins which is reduced by approx. 600,000 skins on last season's figures. The Danish mink production will decline by approx. 4%. Pearl, White, Sapphire, Pastel and Cross mink will be reduced most, but also Black is declining in number. The number of skins in Mahogany, Brown and Glow will increase

marginally, while Silverblue will rise by approx. 12%. The great demand for the Velvet quality has had the effect that a large part of the mink production has been diverted to this type while the production of longhaired mink skins is being reduced. For each of the five scheduled auctions there will be a varied offering of the qualities

Platinum, Burgundy, Ivory and Quality A. The qualities I and II will also be offered. Purple, Kopenhagen Fur's top quality, will be offered at the auctions in February, April and June, and top lots will be sold at all three auctions. Types and Sizes to be offered at the individual auctions 2009/2010 appear from the schedules.
